

Jonathan Little's Poker Cash Game Cheat Sheet

- Think about the action on every street of every hand before you act.
- Do NOT play robotically.
- Don't play the same generic style all the time.
- Adjust your strategy to exploit your specific opponents.
- Exploit your opponents' tendencies.
- Raise with a different range based on the effective stack size.
- When calling a raise, ensure you are getting at least 10:1 implied odds with small pocket pairs and 20:1 with suited connectors.
- When the effective stack is greater than 40 BBs, try to play lots of pots in position, especially when you think you can get heads-up against opponents who play poorly post-flop.
- You MUST get well out of your comfort zone and blatantly exploit your opponents' weaknesses if you want to become a big winner.
- If you only pay attention to your own two cards, your position, and your chip stack, you are certain to fail in the long run.
- You MUST focus on your opponents.
- Pay attention to EVERY SINGLE HAND that takes place during your cash game session.
- Take mental notes about your opponents.
- If you have a bad memory, write the notes in a notebook.
- Take notes on what each specific player does incorrectly.
- Always put your opponent on a RANGE OF HANDS rather than a specific hand.
- Value bet when you think you have the best hand most of the time AND you think your opponent will call with many weaker hands.
- Value bet relatively weak made hands on the turn against loose players/calling stations who rarely fold any made hand or draw.
- Do NOT value bet when you think you have the best hand most of the time and you think your opponent will fold most hands that you beat.
- Do NOT value bet the turn and river against tight players who will fold all their worse hands and continue with all their better hands.
- Pot control to avoid getting blown off your hand and to induce your opponent to bluff.
- Do NOT pot control when your opponents will pay you off poorly.
- Do NOT pot control when your opponents will rarely bluff the river.
- Against players who play too many hands too passively:
 - Value bet relentlessly.
 - Fold when they apply significant pressure.
 - Bluff on later streets when they have a marginal range AND you think they will fold.
- Against players who play too many hands too aggressively:
 - Realize they often have marginal hands even when they apply pressure.
 - Realize that if you induce them to bluff, do not fold decently strong holdings.
 - Be willing to bluff often because they will usually fold if you apply aggression.
 - Bluff them on scary boards.
- Against players who play too few hands too passively:
 - Relentlessly steal their blinds.
 - Fold to their aggression.
- Against players who play too few hands too aggressively:
 - Do not try to bluff them off hands they perceive as strong.
 - Play hands with huge implied odds.
 - Do not stack off with hands worse than top pair, top kicker.
 - Relentlessly steal their blinds.
- Against players who play well:
 - If they think you are tight, bluff a lot.
 - If they think you are wild, play tightly.
 - Apply aggression in intelligent spots.
 - Fold when it is clear they want to put money in the pot.
 - Intelligently avoid them and focus on playing against the weak players.

Jonathan Little's Poker Cash Game Cheat Sheet

Things to Focus on BEFORE Your Cash Session:

Bankroll and Mindset

Do I have the proper bankroll of at least 3,000 to 5,000 big blinds?

If I don't, am I in the mindset to play properly as if I was properly bankrolled?

Do I have enough money on hand to re-buy as necessary?

Sleep

Did I get a full night's sleep?

Breakfast

Did I eat a healthy breakfast?

Study

Did I study my previous games to find my errors?

Mental Focus

Is my mind clear such that playing poker is the ONLY thing that matters now?

Things to Focus on DURING Each Hand of Your Session

Effective Stack Size

How should I alter my play based on the effective stack size?

Casino Bonuses

Should various casino bonuses alter my play?

Expectation

How do I maximize my expectation for THIS hand?

Notes

Am I writing down my difficult hands so I can review them later?

My Opponent

What do I know about my opponent?

What are my opponent's tendencies?

What can I do to take advantage of my opponent's tendencies?

What does my opponent know or think he knows think about me?

Is my opponent doing anything to take advantage of me?

What should I do to be sure my opponent is not taking advantage of me?

Should I play in an exploitable or balanced manner against my opponent?

Things to Focus on AFTER Your Cash Session:

Track Results

Did I record the results of my session?

The Good

What did I do well?

The Bad

What did I do poorly?

Get Specific

Are there any specific hands I have problems with?

Discuss with Friends

Did I discuss my difficult hands with my friends and post them on the PokerCoaching.com forum?

Improve My Weaknesses

What aspect of my game do I need to work on the most BEFORE my next cash game session?

Take Action

What steps can I take IMMEDIATELY to ensure I play better next time?

Learn from top pros with **over \$74 million** in combined earnings!
